

Iconic
Translation Machines

We help the world's largest translation companies, information providers, and government organisations to adopt specialised, secure machine translation solutions of superior quality, tailored with subject matter expertise.

Iconic
Translation Machines

Why choose Iconic?

We created the world's first patent-specific MT engine, and deliver custom solutions for specialist industries, including legal, life sciences, and financial services. It's MT with subject matter expertise.

MT is a force multiplier for growth, enabling you to stay ahead of your competition.

Faster project turnaround

Translate large volumes into more languages, more quickly.

More accurate MT

Enhanced accuracy through sector-specific terminology and subject matter expertise.

Increased revenue

Win more business and maximise profits with expanded translation offerings (raw MT, light / full post-editing).

Reduced costs

Achieve faster translator speed through MT with post-editing. More jobs in less time.

Continual improvement

100% guaranteed improvement over time by incorporating post-editing corrections and translator feedback.

5 Simple Steps to Iconic MT

1. Assess and Act

Iconic's team of MT experts will consult with you, assess your needs, and propose the most effective course of action for your project, be it one of our existing MT solutions or a customised offering.

2. Evaluate

Our quality assurance team will ensure the MT is fit for purpose, whether it's assessing productivity for post-editing or translation usability for information purposes.

3. Integrate

Flexible integration is key to successful MT deployment. Our IT team will work to make sure our MT fits just right into your workflow, whether it's directly through our API or via one of our CAT tool connectors.

4. Translate

You're ready to go! But it doesn't stop there. Improvements and updates are delivered through continuous engagement with our expert team and directly through our translator editing interfaces.

5. Grow

Once integrated we can work with you to expand MT to your other projects, resulting in incrementally greater cost savings, sales, profitability and brand value over time.

“Iconic is a highly personable company. Their MT expertise is unquestionable. But what really makes them stand out is their capability to flexibly adapt solutions to make them fit just right, ensuring better quality MT.”

Olga Beregovaya

Vice President, Language Tools, Welocalize

Our unique Ensemble Architecture™ combines statistics, linguistics, and rules to deliver MT with subject matter expertise.

This is an example of one MT process. Our technology adapts to suit each content type and language.

Exceptional MT talent

Our expert team of MT PhDs and specialist engineers constantly innovate to deliver cutting edge MT software solutions.

We are MT experts.

Personalised service

Our clients enjoy working with us. We combine friendliness with a level of professionalism and responsiveness that goes above and beyond.

Better quality MT

Our proprietary Ensemble Architecture™ enables superior MT engines with a mix of statistics, rules, and linguistic engineering techniques adapted to suit each content type and language.

Expert MT guidance

Our experience can guide you on how best to adopt MT, from best practice and tailoring of engines to translation evaluations and technical support.

Long term, reliable partner

Our company is committed to providing reliable solutions in the long run. Grow with us.

Ever wondered why Chinese is more difficult for MT than Spanish? Check out our Language Challenge Series blog to find out why: www.iconictranslation.com/news/
